The Belmont University Office of Assessment and Institutional Research (OAIR) manages data collection and distribution for internal Belmont stakeholders. While the Office assists in the collection and assemblage of data for state and federal reporting, as well as for public information needs, OAIR is not the University office that can arrange for or provide support for individual inquiries from external sources. The University does not typically grant access to Belmont data or records to those outside the University community. Requests for specific data needs or for surveys may be sent to the University through Gina Miller (gina.miller@belmont.edu) in Office of the Associate Provost for Academic Affairs.
