

BELMONT CSM CAMPS

Newsletter of the College of Sciences and
Mathematics Camps for Middle & HS Students

Another Banner Summer for Belmont Science Camps!

The Belmont College of Sciences & Mathematics celebrated another outstanding summer, expanding our offerings to 11 dynamic camps that brought hands-on discovery directly to students. This year's lineup included an immersive molecular biology research program and an exciting new middle school camp, each designed to put real scientific exploration into students' hands while nurturing their natural curiosity.

Our students' enthusiasm was infectious! Watching them dive into authentic research experiences and tackle scientific challenges with genuine excitement reminded us why we're passionate about creating these opportunities. The energy and engagement we witnessed throughout the summer exceeded our expectations.

We were also thrilled to support the College of Pharmacy & Health Sciences with their "Pathways to Healthcare Practice" camp. This collaboration opened new doors for students interested in health sciences, and we're eager to expand this partnership in future summers.

Beyond the science itself, what truly inspired us was watching students forge meaningful connections with peers who share their interests. Seeing these bright minds collaborate, support each other's discoveries, and build lasting friendships reinforced our commitment to fostering Nashville's next generation of scientists and innovators.

As we look ahead, we're energized by the impact our campers made—not just in their own learning journeys, but in the vibrant scientific community they helped create. Their curiosity and dedication continue to inspire our growth and vision for future programs.

2025 CAMPS

Research Immersive Summer
Experience in Data Science
June 2 - July 3

Research Immersive Summer
Experience in Molecular &
Cellular Biology
June 2 - June 6

STEM Explorers for Middle
School Students
June 2 - June 6

Game Design and Programming
June 2 - June 6

The Inside Scoop: A Bruin's
Guide to the Human Body
June 23 - June 27

Chem-mystery: Introduction to
Forensic Chemistry
June 23 - June 27

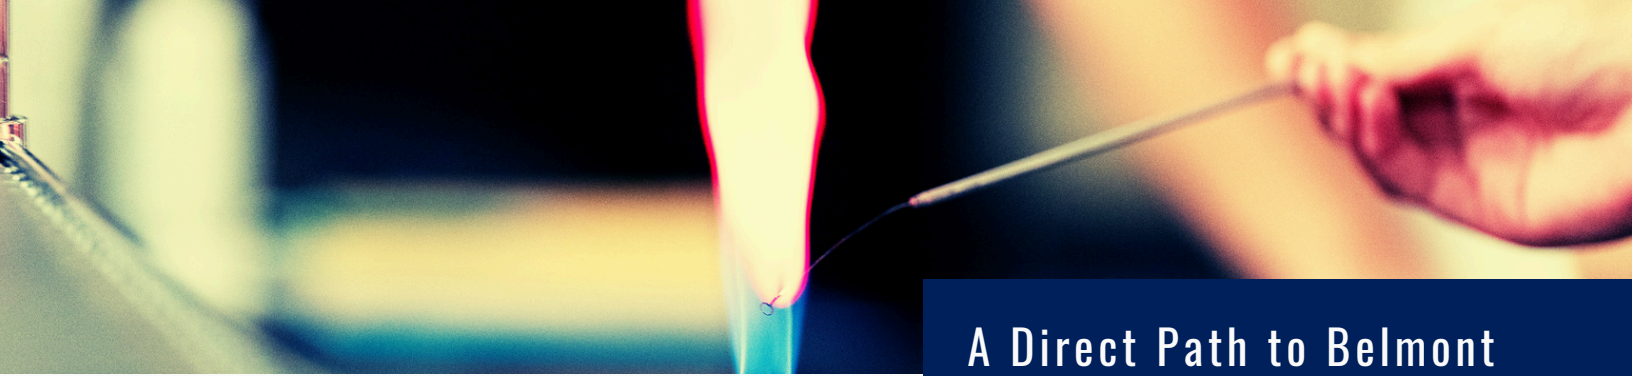

Visualizing our Invisible
Surroundings Immersion at
Belmont Labs
July 7 - July 11

Sports Analytics
July 7 - July 11

Microbe Detectives: An
Introduction to Medical
Microbiology
July 14 - July 18

From Brain to Behavior at
Belmont
July 21 - July 25

The Math of Games
July 21 - July 25

A Direct Path to Belmont University

Building on last year's successful launch, we're thrilled to continue offering our camp seniors a unique pathway to their future—direct admission to Belmont University. This exclusive opportunity reflects our commitment to nurturing talented students from their first spark of scientific curiosity through their college careers. We're eagerly anticipating which of this summer's exceptional participants will join the Belmont Bruin family, and we're excited to maintain this bridge between our camps and university programs for years to come.

Students, what was your favorite part?

- “Everything. So much fun getting to do so many labs and getting to be around other people who also love it.”
- “Getting to meet new people my age interesting in the same things I’m interested in and learning more about the field I want to go into.”
- “I liked how nice everyone was on campus. i don’t think I had someone not smile at me all week. I enjoyed the activities we did as a group”

Looking forward to 2026

Next summer promises to be our most ambitious yet! We're planning to return with many of this year's popular programs while exploring exciting expansions to our middle school offerings and developing even more immersive research experiences. These enhancements will provide deeper opportunities for young scientists to engage in authentic discovery and advanced study.

Mark your calendars—our complete 2026 camp lineup will be available December 1st, 2025!
